

Normally the **safety nets manufactured in Visornets** comes regularly in standarized sizes by market or costumer , always square or rectangle sizes.

But what it happens if a costumer need a specific safety net for a particular solution where the net is not square or rectangle?

Well, no problem at all at Visornets, we do have a fully experienced engineer department and experienced netmakers as well, so we can make it real any drawing you need for your Project as so special as it wil be.

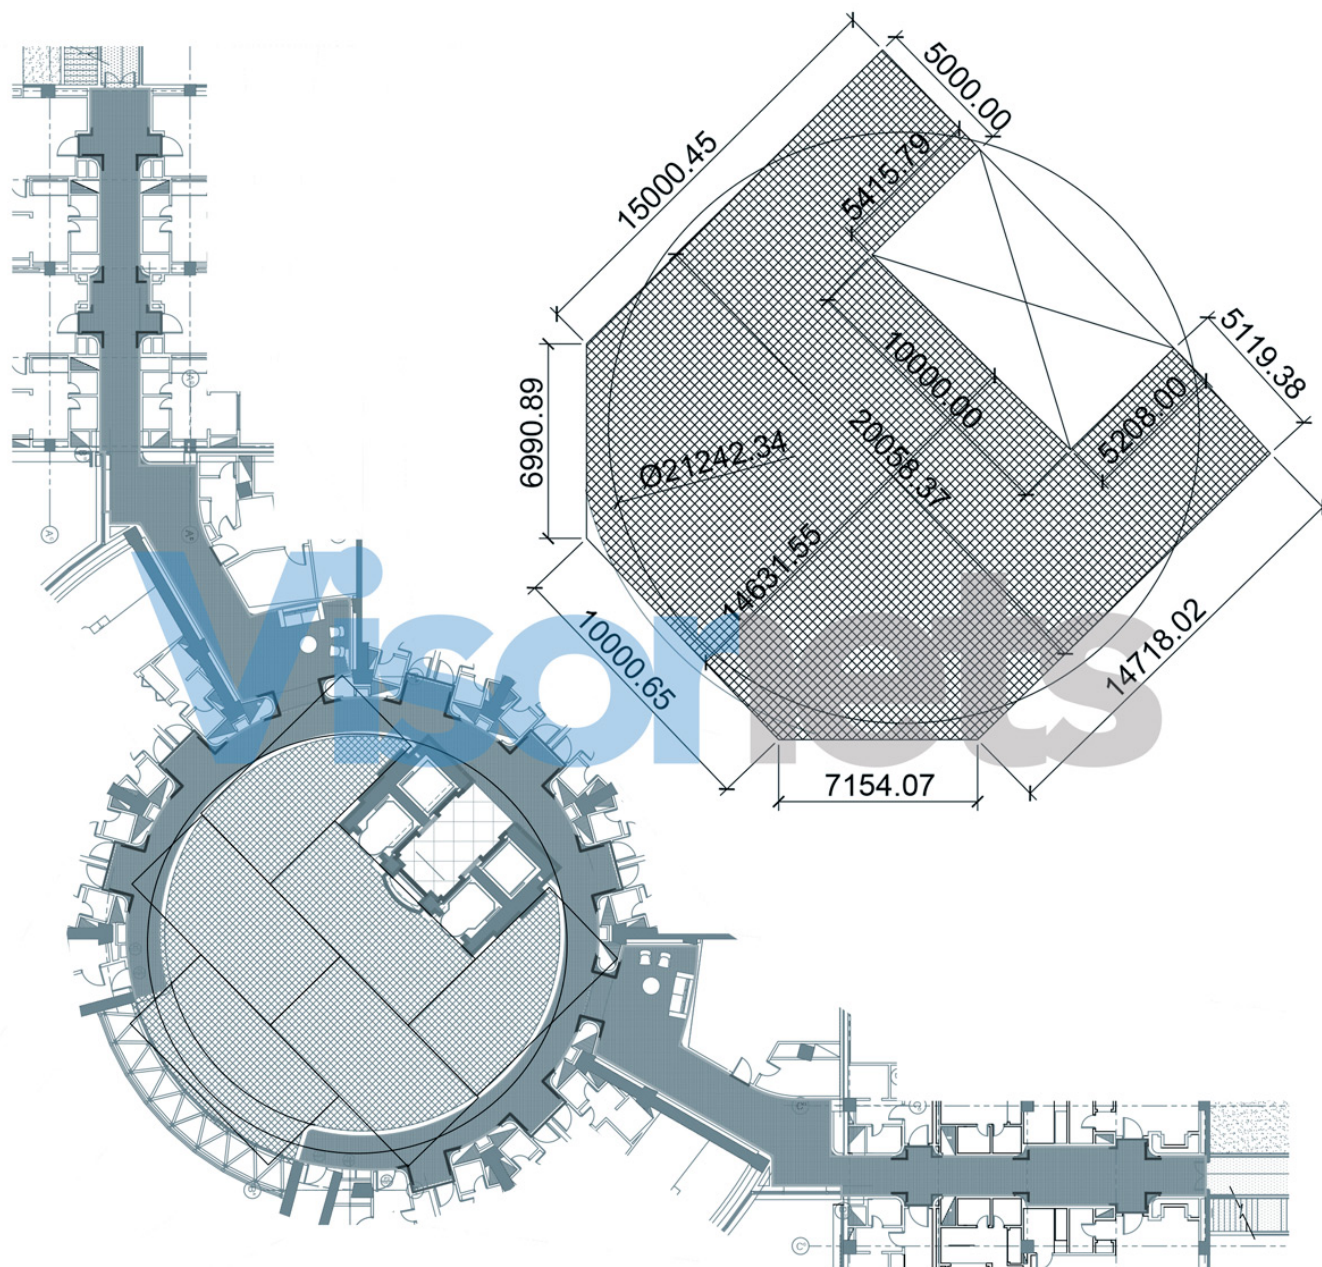

Let's see one of the latest special Project: A customer came to us asking if it is possible to make a safety net with a very special shape, because they have to install it for protecting the fall people and debris in maintenance labours inside a big rated hotel. The solution with netting had to protect the worker and the hotel clients because the net will have to be just up in the lobby.

Safety net Type S - Special shape

Safety Nets: Customized nets by costumer drawings

As a result our costumer gave us
congratulations. They said: “The nets fix like
a glove”.
